FOR YOUR SIMPLE TO COMPLEX DESIGN SOLUTIONS

We take the time to design and fabricate our buildings right, so you don't have to do them over. Your customers look to you as a single source, and in partnership with us you can offer seamless systems construction with a high degree of confidence as well as cost predictability. In addition, we will support your sales efforts.

From your initial call to our office, your District Sales Manager will be your advisor throughout the entire process.

Systems construction can often require customized solutions with high quality and reliable designs. We pride ourselves on our engineering experience with designing retrofits, additions, hybrid buildings, and multiple unit buildings.

Our international experience includes projects of all sizes with both private and governmental applications on three continents in twelve countries with continued growth.

While we strive to be a low-cost producer, we consistently rank high with regard to industry standards in terms of product quality and reliability. Our standard products, such as galvanized purlins and girts enable your building to achieve a low life-cycle cost.

With a totally integrated manufacturing facility, Sukup Steel Structures produces a complete systems construction solution.

Continuous improvements in technologies and procedures in our service offerings as well as our factory performance contribute to our positive growth. The best quality materials and workmanship go into the manufacturing of every Sukup Steel Structures steel building system.

WHAT WE OFFER?

- *Engineering and Field Sales Service on the front end of project*
- *Field Sales Installation Service on the back end of the project*
- *Technical Services*
- *Parts and Pieces*
- *Component Enhancements*
- *Warranties*

OUR QUALITY MANAGEMENT SYSTEM PROMOTES CONSISTENCY

SUKUP STEEL STRUCTURES FACTORY FEATURES:

- Computer numerical control production lines with electronic download linkage to engineering
- 100% American Welding Society and Certified Welding Supervisor certified welders maintained with in-house Certified Welding Inspector

- Recognized accreditations in IAS AC-472 and Canadian A-660
- Full width and breadth of systems product with in-house production
- Mini-Storage product manufacturing capability
- Full product offering on building system components for framing systems, wall systems, and roof systems
- Full capability to process low to high complexity on Metal Building Manufacturers Association scale of 1-10
- An active manufacturing member of the Metal Building Manufacturers Association
- 20 years of operational experience in providing high quality metal building systems solutions
- Flexible multi-shift crew cross-trained across all processes and production lines
- The only major manufacturer who packages all trim and building finishing materials in solid wood containers to prevent damage to contents
- Supply of USA (domestically) produced material from leading steel suppliers (period)

FACTORY CAPABILITIES

The factory is located in the western Pennsylvania region. Sukup Steel Structures offers the Zeus-Shield Standing Seam roof system product and two architectural style roofs. All hardware, building accessories, and fasteners are provided in high-strength, corrosion-resistant finishes and color coded to match exterior paint finish where exposed.

Sukup Steel Structures | Ambridge, PA

Framing

Framing will vary based on design.

WHY BUILD WITH STEEL?

STRENGTH *- Steel buildings generally withstand higher winds and loads than wood.*

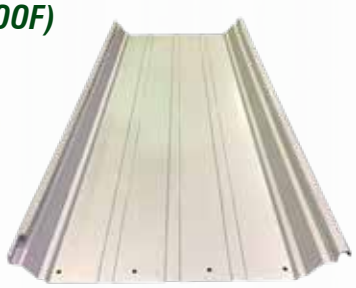
DURABILITY *- Steel buildings outlast wood buildings and are completely recyclable. Decommissioning a wood building only pays you back with a bonfire (after removing the panels).*

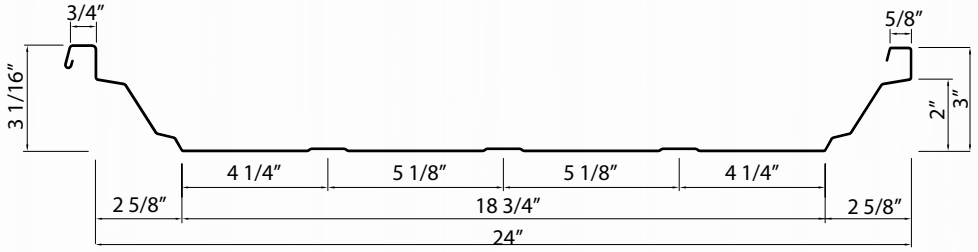
CLEAR SPAN *- Steel buildings can clear span greater distances than wood.*

INSIDE CLEARANCE *- Steel buildings provide greater inside clearance than wood because of the rigid frame rafter design. The common bay size of a steel building is greater than a wood building as well.*

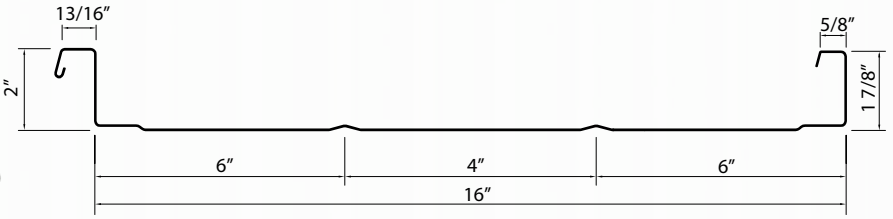
ELEMENTAL RESISTANCE *- Steel buildings are safe from termites, rot and mold, and drying out. Steel buildings won't shrink, warp, or swell.*

TRAPEZOIDAL PROFILE
(ROOF)

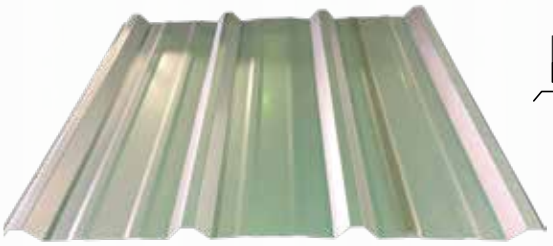


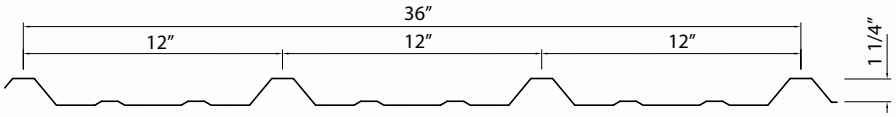


ARCHITECTURAL PROFILE (BEADED)
(ROOF)



PBR PROFILE
(WALL/ROOF)





We also offer 16”/18” Flat Profile and Striated Profile Architectural Panels

WALL PANELS

Exterior Wall Panels
Sukup Steel Structures exterior PBR wall panels are made from 26 gauge steel and feature extra deep 1 1/4” ribs for greater durability and strength. Exterior panels are available in all 12 Sukup standard colors and Galvalume® + so your building can have both strength and beauty.

Liner Panels
Sukup Steel Structures also offers a 26 & 29 gauge interior liner panel to give a nice finished look to the inside of any building.

ROOF PANELS

Standing Seam Roof
The point of putting up a building to house your machinery, shop and office is to keep your property dry and safe. Doesn’t it make sense then, to put up a building that’s virtually leak-proof? The seams on Sukup Steel Structures standing seam roofs are mechanically rolled in the field to create a 360° Pittsburgh double-lock seam. This seam creates a tight, durable, virtually leak-proof seal.

Screw-Down Roof - PBR
Sukup Steel Structures also manufactures a 26 gauge screw-down roof. This style of roof is economical and simple to install. Screw-down roofs are available in Galvalume® + and all Sukup standard colors.

Sukup Steel Structures wall and roof panels are made from Galvalume® + AZ-55 substrate for superior corrosion resistance, so they will look good for years to come.

THE COLORS YOU WANT. ***THE SAVINGS YOU DESERVE.***

All Sukup Steel Structures are coated with CERAM A STAR 1050 silicone modified polyester or TRINAR 70% PVDF. These industry leading coating systems utilize superior reflective qualities to effectively cool your steel building. This reduces the amount of energy and potential costs needed to cool the building.

CERAM-A-STAR® *1050 Silicone-modified Polyester*

The toughest, most durable finish in it's class. Proven to withstand the harshest elements, while delivering superior color stability and resistance to chalk and fade. An excellent alternative to more costly PVDF coatings. It features a 30 year fade warranty and a 40 year adhesion warranty.

Brite Red

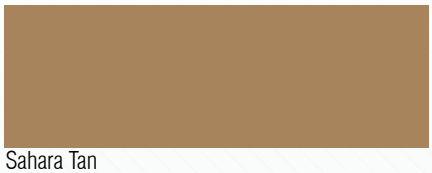
Colony Green

Polar White

Rustic Red

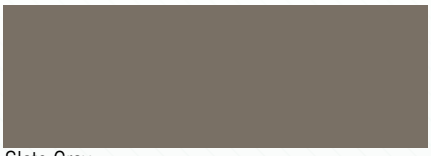
Fern Green

Pearl Gray



Sahara Tan

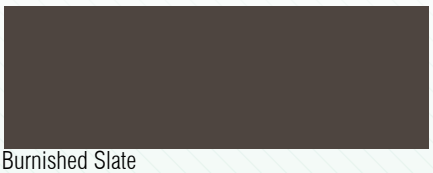
Hawaiian Blue



Slate Gray

Lightstone

Gallery Blue



Burnished Slate

TRINAR® *70% PVDF Color Finish*

TRINAR offers the highest level of coatings performance, with exceptional durability and outstanding color and gloss retention. Proven to withstand the harshest environments, TRINAR delivers decades of protection and lasting color with a 35 year fade warranty and a 35 year adhesion warranty.

Autumn Red

Wedgewood Blue

Hunter Green

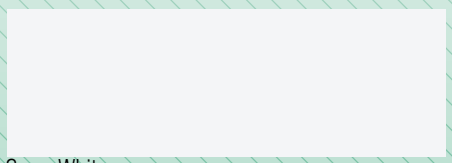
Cardinal Red

Medium Bronze

Flint Gray

Sagebrush

Battleship Gray

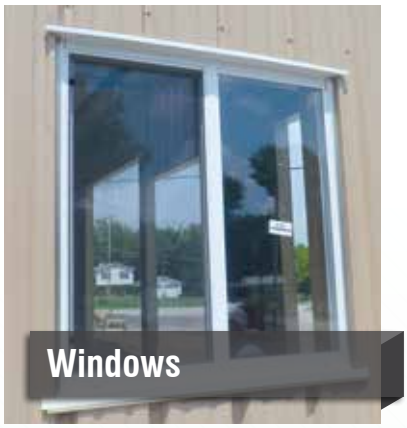


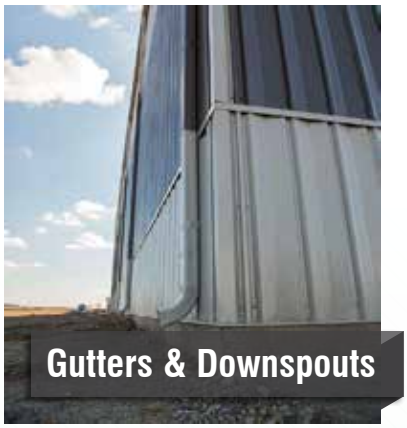
Snow White

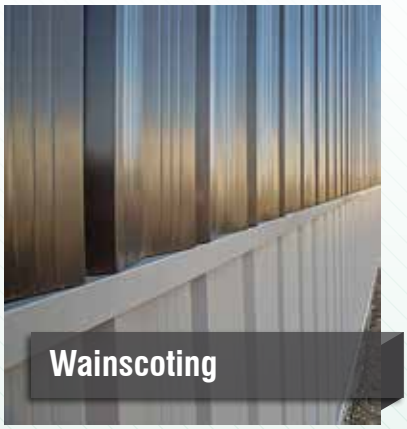
Color reproduction may vary slightly. This color chart is for reference only and is not to be used for final color choice. See actual color sample from supplier to determine true color. Sukup Steel Buildings are backed by a one year standard limited warranty. Galvalume® and Trinar® are registered trademarks of their respective companies.

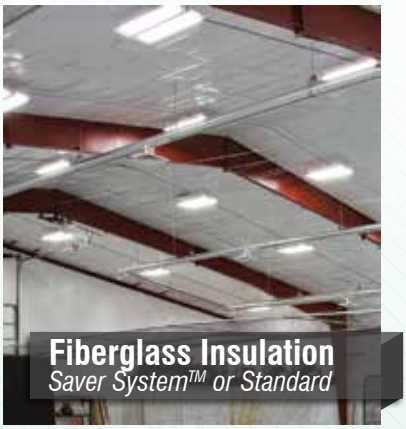
GET YOUR BUILDING. **THE WAY YOU WANT IT.**

Sukup Steel Structures feature a number of options including a full line of walk-in doors, windows, fiberglass insulation packages, translucent wall panels, canopies and more! You can be sure you will get exactly what you want.









CAPABILITIES

- Solid web frames to 250 feet +
- Standing Seam Roofs
  + 24” Trapezoidal
  + 16” and 18” Vertical Seam
- Standard Roof and Wall Panels
  + Panel Rib with PBR
  + Reverse Rolled
- Other Wall and Siding Options
- Galvanized Secondary G-40
- Gray Primer
- Hot-Dipped Structure option
- Up to 1” SSR Thermal Block thickness
- Roll Formed Trim to 20’
- Trim shipped in hard wooden crates
- Entry Doors
- Overhead Doors & Sliding Doors
- Insulation
- Components

SUKUP STEEL STRUCTURES SUPPORTS THE REAL-WORLD NEEDS OF BUILDERS AROUND THE GLOBE

We make it easy to have business success using Sukup Steel Structures!

With our estimating software and detailed proposals, cost predictions is easier!

STEP 1: SIMPLY MAKE A CALL.

Call us at 800.937.1452, and we will connect you with one of our certified District Sales Managers to discuss your project. Sukup Steel Structures believes service is our most important product.

Cook Horse Barn | Powell, OH

STEP 2: VISIT THE PLANT.

Our automated technology enables the factory to produce higher quality building system components in less time at a very competitive price. Your assigned District Sales Manager will make it easy for you to visit our facilities and meet our craftsmen.

STEP 3: TAKE A TEST DRIVE.

Give our team an opportunity to quote the project. We'll put together a proposal featuring top quality standard products, such as galvanized purlins and girts and standing seam roof systems that are backed by certified quality standards, industry leading warranties and excellent sales service. We will engineer, fabricate and deliver your project "hassle free."

STEP 4: CONSTRUCT THE BUILDING.

Our technicians will quickly respond to your inquiries during the construction process. When completed, we'll support your marketing efforts to showcase your building. If you like the process, jump on board and become a Sukup Steel Structures Contractor/Builder. We will help you become an authorized Builder so you can use our proprietary software to assist your customers with preliminary building system design, specification conformance and the completion of the system procurement process. A two-day software training for your staff will be provided.

Robert Morris University | Moon, PA

Systems construction buildings are easy to erect, and adding building accessories of all types is easy. Made of 90+% recyclable materials, steel buildings are environmentally friendly, and our Cool Chemistry® roofs help to make our buildings energy efficient as well as qualify for LEED recognition.

Brighton Township Fire Department | Beaver, PA

WE BELIEVE SERVICE IS OUR MOST IMPORTANT PRODUCT. EXCELLENT QUALITY SERVICE IS THE FOCUS OF EVERY DEPARTMENT IN OUR COMPANY.

Sukup Steel Structures designs, engineers, and manufactures systems construction buildings utilizing steel frame I-beam platform. All secondary framing, including purlins, girts and base angles, is hot-dipped galvanized providing long-life rust protection. We offer a 40-year limited warranty against chipping, cracking, peeling or blistering on all panel and trim with CERAM-A-STAR® 1050 Silicone-modified Polyester. We also offer the same limited warranty with 35 years for our Trinar 70% PVDF Color Finish.

Rockport Ready Mix | Cleveland, OH

Sukup Steel Structures will qualify for LEED product recognition. Made of 90+% recyclable materials, steel buildings are environmentally friendly, and our Cool Chemistry® roofs help to make our buildings energy efficient.

Our stainless steel capped fasteners come with a lifetime corrosion protection, and Sukup Steel Structure's industry standard roof systems are backed by a full package of performance warranties.

Sukup Steel Structures can better withstand the ravages of weather, cost less to maintain, and provide a longer lasting structure to building owners.

Sukup Steel Structures manufactures annually in the US and internationally from our Ambridge, Pennsylvania factory.

About **Sukup Manufacturing Co.**

Sukup Steel Structures is a fully-owned subsidiary of Sukup Manufacturing Co. Sukup has over 55 years of experience in manufacturing steel products. Our main manufacturing facilities and offices in Sheffield, Iowa, along with our six distribution centers, boast over one million square feet of manufacturing space. In 2014 we completed construction of our new corporate office building. We manufactured over 800,000 pounds of structural steel in-house to complete this project.

Sukup Manufacturing Co. has come a long way from its start in a welding shop in 1963. Company wide, Sukup is filled with the most advanced metal fabricating equipment. With over 80 patents, Sukup manufactures a full line of equipment for in-bin drying and storage, as well as dryers, farm and commercial grain bins, material handling equipment and steel buildings.

Sukup continues to grow and is the fastest growing bin company of the decade.

No matter how much the company grows, one thing stays the same - the personal touch that comes from a family-owned company.

Being a family-owned company with many long-term employees allows Sukup Manufacturing Co. to remain dedicated to our customers and providing them the best quality products and best value for the money.
